

## Petition placard Save the outdoor pool in Hamburg-Rahlstedt - 90.000 citizens are living in Hamburgs largest district

**By:** Wolfgang Trede **from:** Hamburg **to:** Hamburger Senat **in:** Hamburg-Rahlstedt.

The problem: "Verdichtungswahnsinn" (compression madness) in Hamburg! At present, only about 8.5% of Hamburg's land area is under nature conservation! The surface pollution in Hamburg must be stopped immediately. Every green meadow, every agricultural field, fields, meadows, nature conservation areas, nature reserves, biotopes and public parks must be protected from exploitation. Housing and commercial space at any price - this must now be over. How does it work? For example with a popular initiative of the NABU starting 1.12.2017
